

# **Application for Additional Service Credit Purchase**

# Section 1: Service Credit Purchase Cost Estimate

With the approval of the employer and the local governing body, participants can purchase additional service credit to help meet an early retirement eligibility provision or to increase their pension benefit. Unlike MERS-to-MERS or Act 88 time, purchased service credit generally cannot be used to reach vesting.

# This estimate is only valid for two months after March 1, 2020, the effective date of this calculation.

The cost to purchase service credit for each individual is based on many factors. Below is the information that MERS used to prepare this estimate. Please review the following information for accuracy. If any is incorrect, this estimate may not be correct.

# Participant Information Tiffany Handy

Date of Birth:

Age:

Spouse's Date of Birth:

FAC as of calculation date:

\$74,953.88

#### Service Credit

Earned service credit as of calculation date: 17 years, 0 months

**Vesting Only Service:** 

Other Governmental Service used for

Eligibility (MERS or Act 88):

Type of Credited Service to be Purchased:

Amount of additional service requested:

Generic

3 years, 0 months

# Employer Information Pittsfield Chtr Twp

8110 / 02

# **Benefit Program**

Benefit B-3 (80% max)
Benefit F50 (With 25 Years of Service)

Early Reduced (.5%) at Age 50 with 25 Years or Age 55 with 15 Years

Benefit FAC-3 (3 Year Final Average Compensation)

10 Year Vesting

E2 2.5% COLA for future retirees (12/01/2009)
Defined Benefit Normal Retirement Age - 60

# **Benefit Impact**

went off	Earliest Eligibility Retirement Date	Retirement Age	Projected FAC	Х	Service Credit	X	Benefit Multiplier	72 12	Annual Benefit
Before Proposed Purchase	11/1/2028	50 years 0 months	\$96,838.95	23	25 years 8 months	usoj l	2.25%		\$55,924.56
After Proposed Purchase	11/1/2028	50 years 0 months	\$96,838.95		28 years 8 months		2.25%	2634	\$62,461.20

Estimated Cost of This Service Credit Purchase: \$65,979.00

The total cost is due in full at the time of purchase and may be paid by either the participant or employer. You may be eligible to transfer assets from other accounts to make a payment for the purchase, such as: 457 Deferred Compensation Plans; 401 plans; 403(b) plans; and some IRAs (traditional and SIMPLE). To initiate this transfer complete the form *Certification of Qualified Fund Rollover to MERS* (form number F-38). Send signed, approved Application for Additional Service Credit to MERS prior to sending any payment.

# Section 2: Calculation Assumptions

#### 1. Projected Earliest Eligible Retirement Date

This date is calculated using the participant's date of birth, the amount of service credit reported by the employer, and other service credit that we have on record (such as MERS-to-MERS or Act 88 time), if any of this data is incomplete or inaccurate this can affect the cost estimate. If the participant chooses to retire on a different date, it may increase/decrease the actual cost.

### 2. Projected Final Average Compensation (FAC)

Future increases in the FAC are assumed to be a 3.00% annual increase. This calculation is dependent on the wages reported by the employer to MERS. If the actual increases end up being different than the assumption, it may increase/decrease the actual cost.

#### 3. Projected Service Credit

Signed:

It is assumed the participant will continue to work until the earliest date for unreduced retirement benefits unless a specific termination date is shown. Any deviation from the earliest eligibility date may increase/decrease the actual cost.

### 4. Benefit Program

The current benefit plan provisions are used to calculate the cost of purchasing service credit. If the participant transfers into a different division and is eligible for a benefit plan with different provisions, then the cost may differ from the initial calculation. Likewise costs may differ if the municipality adopts different benefits in the future for any participant that has purchased service credit. These changes will be reflected in the actuarial valuation required to adopt any benefit increase.

#### 5. Investment Assumption

The current investment return assumption for service credit purchase is 6.35%.

#### 6. Mortality Rate

Assumptions are made on the life expectancies of the participant and their surviving spouse, using tables generated by actuarial professionals.
