

10-18-2020

The residents of the Oak Hill Subdivision understand that open burning of leaves and yard waste will NOT be allowed beginning January 1, 2021. Due to the extensive foliage, disposal of leaves using the regular waste management company creates a physical burden for many of the residents. Therefore, the residents of Oak Hill Subdivision, through the submission of this petition respectfully request assistance from Pittsfield Township and its Board of Directors by asking them to contract the use of a vacuum truck to support the removal of leaves twice a year. Specifically, three times in the Spring and three times in the Fall beginning in 2021 and moving forward. The exact dates of pick up will be determined at a later date. We further request Pittsfield Township add the contracting of a vacuum truck to the Pittsfield Township budget moving forward.

Signing this document does not require you to participate in the use the vacuum truck, nor does it eliminate the use of the regular rubbish pick up the remainder of the year. The residents of Oak Hill are seeking approval from the majority of our residents so we may move forward with a favorable resolution regarding the disposal of leaves in an environmentally conscious manner.
